Subject: TDEC's written request for March 2012 report (ERDC/EL TR-12-8)

Good day all,

Would please provide us with a copy of each of the written requests TDEC has sent to the U.S. military requesting the March 2012 report (ERDC/EL TR-12-8) titled "Alternative Treatment Options for Open Burning of Explosive Waste at Holston Army Ammunition Plant", as well as the military's response to your request? As we all know, HAAP's permit requires them to provide this information to you, regardless of whether or not they claim a proprietary interest in the materials. If no written request has been made, please advise us of the dates of all verbal requests and the military's response thereto. It would appear to me that this information is extremely important in determining whether Holston's application for renewal of it's Title V Air Permit should include permission to open burn the materials which Holston admits can be treated by alternative treatment methods in the attached letter to Mr. Styke dated July 12, 2013. Also attached please find an email which indicates that the report is "UNCLASSIFIED" Thank you for your time and your anticipated cooperation.

Cordially,

Mark and Connie Toohey
